

## 2024 ANNUAL REPORT

TRUE.  
BLUE.  
TRANSITION.

## 4 FINANCIAL INFORMATION 2024

receivables are recognized initially at fair value. The Company holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortized cost, using the effective interest method. The Company applies the simplified approach in measuring expected credit losses for trade receivables.

Other receivables are recognized initially at fair value and subsequently measured at amortized cost, using the effective interest rate method. Interest income, together with gains and losses when the receivables are derecognized or impaired, is recognized in the income statement.

### **(k) Impairment of finance lease receivables**

For finance lease receivables, the Company assumes that the credit risk has not increased significantly since the initial recognition if the finance lease receivable is determined to have a low credit risk at the reporting date (i.e. the Company applies the low credit risk simplification). As a result, if the finance lease receivable is determined to have a low credit risk at the reporting date, the Company recognizes a 12-month expected credit-loss.

### **(l) Cash and cash equivalents**

Cash and cash equivalents consist of cash in bank and in hand fulfilling the following criteria: a maturity of usually less than three months, highly liquid, a fixed exchange value and an extremely low risk of loss of value.

### **(m) Share capital**

Ordinary shares and protective preference shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

### **(n) Income tax**

The tax expense for the period comprises current and deferred tax. Tax is recognized in the income statement, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the associated tax is also recognized in other comprehensive income or directly in equity.

Income tax expenses comprise corporate income tax due in countries of incorporation of the Company's main subsidiaries and levied on actual profits. Income tax expenses also include the corporate income taxes which are levied on a deemed profit basis and revenue basis (withholding taxes in the scope of IAS 12). This presentation adequately reflects the Company's global tax burden.

### **(o) Deferred tax**

*Deferred tax* is recognized using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is determined using tax rates and laws that have been enacted or substantially enacted by the statement of financial position date and are expected to apply when the related deferred tax asset is realized or the deferred tax liability is settled.

*Deferred tax assets* are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. Deferred tax is provided for on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future.

### **(p) Employee benefits**

*Pension obligations*: the Company operates various pension schemes that are generally funded through payments determined by periodic actuarial calculations to insurance companies or are defined as multi-employer plans. The Company has both defined benefit and defined contribution plans:

- A defined benefit plan is a pension plan that defines the amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.
- A defined contribution plan is a pension plan under which the Company pays fixed contributions to public or private pension insurance plans on a mandatory, contractual or voluntary basis. The Company has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. The contributions to defined contribution plans and multi-employer plans are recognized as an expense in the income statement as incurred.
